

## A Dynamic Global Company

---

Carestream Health is a dynamic global company with more than 100 years of leadership. We are passionately committed to doing whatever it takes to help our customers be successful. By applying our insights and experience, we create inventive, elegant solutions that offer a smarter way forward.

In today's global healthcare environment—where the mandate to provide better outcomes for a better life has never been greater—we add value by delivering flexible, affordable and practical options to help our customers advance.

Carestream Health's promise is helping customers do their jobs better, faster and more cost effectively. And we deliver on this promise everyday. Medical providers large and small—from clinics and single hospitals to large networks and even entire countries—are advancing their radiology and IT systems using our medical solutions.

Our dental business continues to thrive in providing oral health professionals around the world with leading dental imaging and practice management products. Our molecular imaging business sits at the forefront of preventative and predictive medicine through the pioneering work performed by tens of thousands of researchers who use our technology.

We also serve industrial markets with our non-destructive products, enabling customers to capture high-quality images for applications such as aircraft inspection, assemblies, castings and forensics. And the Carestream Advanced Materials group is developing innovative new film products for the printed electronics market including solar-panel and touch-screen technology.

## AT A GLANCE

Approximately \$2.3 billion  
in revenue in 2010

7,000+ employees worldwide

Present in 150 countries  
around the world

Headquartered in  
Rochester, NY USA

# CARESTREAM Company Profile

## About Carestream

### We're a market leader

We have thousands of healthcare information management solutions—such as RIS/PACS, eHealth Services and more—installed worldwide.

We are one of the top global providers of both computed radiography (CR) and digital radiography (DR) systems, with a track record for innovation including the world's first wireless, cassette-size DR detector (the CARESTREAM DRX-1 System).

Our dental digital radiography equipment and practice management installed bases, respectively, are among the largest in the world.

Our molecular imaging products—digital molecular imaging systems, imaging agents, and film—are ranked among the top three in their markets.

Our Non-Destructive Testing business has more than 50 years' experience serving industrial safety and inspection markets.

We own more than 800 patents for medical and dental imaging and information technology.

### The company's origin

In 2007, Onex Corporation purchased Eastman Kodak Company's Health Group and established it as an independent company: Carestream Health. Our business pioneered many innovative products that remain the "gold standard" today, and we honor our rich heritage by ensuring our standards for excellence continue.

### Our parent company

Carestream Health is proud to be part of the Onex family of companies. Onex, one of Canada's largest and most respected corporations, owns a group of autonomous companies that includes Celestica, Hawker Beechcraft and Skilled Healthcare Group.

Onex Corporation trades publicly on the Toronto stock exchange (OCX).

## How we serve customers

### Medical imaging & IT

Scalable solutions for every step of diagnostic imaging—from exam ordering, image capture and diagnosis to results distribution, billing and beyond.

- More digital choices for medical imaging—from general radiography to specialty practice applications like mammography, oncology, orthopedics and CAD
- Integrated RIS/PACS and information management solutions that combine images and patient information for processing, diagnosis, sharing and storage
- Flexible CR and DR solutions that solve workflow, budget and space challenges while reducing procedure times
- Market-leading laser imagers for printing medical images of all types including CT, MRI, ultrasound, CR and DR
- A broad range of professional services including project and remote management, as well as specialized training

### Dental systems

Innovative imaging products that capture, process, print, view, store and send dental images—ranging from complete digital solutions to traditional x-ray film products.

- Market leading intraoral and extraoral digital X-ray equipment and imaging films
- Intelligent, intuitive dental imaging and practice management software

### Molecular imaging

In vivo and in vitro optical molecular imaging and pre-clinical PET/SPECT/CT solutions for life science and molecular biology research.

- Complete solutions that include digital capture systems, image analysis software, imaging agent chemistry and traditional scientific films for sensitive, high-performance and reliable imaging solutions

### Non-destructive testing

High-quality products for a wide range of industrial applications including aircraft inspection, assemblies, castings and forensics—just to name a few.

## Our Core Values

**CUSTOMERS** are the beginning and the end of everything we do. We understand their needs, exceed their expectations in ways that are meaningful to them, and enable their success.

**PEOPLE** are our most important asset. To our customers, our people are our company. We attract the best people and create an environment where they reach their full potential.

**EXCELLENCE** is our enduring aspiration. We take pride in our work and continuously improve.

**WINNING** is our ultimate goal. We stretch ourselves, we overcome obstacles, we play fair—and we win.

**INNOVATION** is our passion. With enthusiasm and creativity we develop high impact innovations.
